

PTAC
SUBCENTER

Interested in Contracting with the Government?

Southwestern Pennsylvania Commission Procurement Technical Assistance Center (SPC PTAC), a subcenter of the JARI PTAC, is here to assist with your government contracting needs for businesses in Allegheny, Armstrong, and Westmoreland Counties.

SAM.gov Registration

SAM.gov registration lets government agencies find your business. We also assist with small-business certifications, like WOSB, VOSB, 8(a), and HUB-Zone so your business is eligible for set-aside contracts. We also assist with contracting registration at the local, state, and federal level.

Marketing Assistance

SPC PTAC has the tools to provide you with historical spending data, letting you know which agencies have spent how many dollars on similar products to yours. Additional assistance includes crafting a capability statement.

Bid Match Assistance

SPC PTAC offers a free service that delivers eligible bids to your inbox every day. These bids are based on your NAICS and PSC/FSC codes.

Bid Read Through

SPC PTAC will read through bids you're interested in applying to with any feedback on what the government's looking for from contractors before you decide to apply.

Solicitation Proofreading

Once you have decided on a bid and are ready to apply, SPC PTAC can proofread your solicitation prior to submission. If awarded, SPC PTAC offers post-award assistance.
