

Appendix IV: Regional Vision Project Lists for Southwestern Pennsylvania

September 2023

- IV-1: Revenues and Projects Currently Within Fiscal Capacity

Appendix IV-1: Revenues and Projects Currently Within Fiscal Capacity

Introduction

The Fiscally Constrained Plan identifies a set of multimodal fiscally-constrained transportation projects, programs and initiatives undertaken to advance the Regional Vision, Goals and Strategies. Public transit investments are key strategies in providing mobility for Southwestern Pennsylvania residents, as well as mitigating the impacts such as air pollution and congestion that are inherent in a vehicle-based transportation system, while additionally contributing to many of the highway system goals. Highway system investments support state of good repair goals for highway infrastructure, reduced fatalities and injuries from vehicle transport, reduced congestion and efficient highway operations, strengthened rural access to markets, and support for regional economic development, while mitigating the environmental impacts from still-growing levels of traffic. The linkage between the investments contained in this section and how they support and advance the *Smart Moves* Vision, Goals and Strategies is described in the previous Appendix III: Investment and Strategy Linkage.

This Appendix (IV-1) presents the Revenues and Projects Currently within Fiscal Capacity (fiscally constrained investment plan); anticipated funding for this part of the Plan is provided through the SPC TIP. The LRP also includes sections related to additional transportation investments from funding sources beyond the SPC TIP: Pennsylvania's Interstate Management Program and the PTC's Turnpike Capital Projects (Appendix IV-3 and IV-5, respectively). Appendix IV-3 also includes a list of unfunded Interstate needs for consideration into the Interstate Management Program.

A list of Projects Currently Beyond Fiscal Capacity is included as Appendix IV-2. It contains regional high priority projects that are part of the Regional Vision of *SmartMoves*. These projects are unfunded at present; however, SPC is committed to pursuing additional funding so that they can be advanced within the plan period. For many of these projects, through collaboration with our Planning Partners, project needs are identified and often advanced through the early planning stages, preparing them as well-defined priority candidates for other state or national discretionary funding sources (except where noted) beyond SPC's TIP resources.

Tables IV-1 through IV-3 introduce the financial planning section by identifying constrained revenue amounts for transportation investments expected to be delivered through the SPC 2023-2026 TIP and *SmartMoves*.

The Revenues and Projects Currently within Fiscal Capacity element is presented in two sections:

Transit Program and Highway Program. The lists are grouped by investment categories and represent a broad range of multimodal transportation improvement projects. The Investment and Strategy Linkage Appendix (III) describes the transit and highway investment categories and the types of improvements categorized under each category. Appendix III also discusses the linkages between the Investment Categories and the *SmartMoves* Strategies and federal performance metrics.

Each program, transit and highway, presents an overview of the program, documents project selection processes, summarizes investment results, and identifies project lists for each investment category. Summary tables for each program provide a means for comparing transportation investments at both the program level and investment category level. The Transit Program includes tables identifying prospective transit capital investments for each transit agency. The Highway Program summary includes breakout details for each PennDOT District area.

Investment Category-based project lists were developed through cooperative planning processes grounded in the Regional Vision, Goals and Strategies; the ten federal Planning Factors and the federal National Performance Goals. The project selection process considers overall transportation needs (transit, multimodal mobility, highway operations, safety, and state of good repair/condition of highway and transit physical assets, environmental and economic development impacts), and federal performance requirements, within identified fiscal-constraint limits. Detailed information on federal performance measures and future performance targets is provided in Appendix II.

Current system condition and measured performance are generally favorable for the SPC region relative to the Commonwealth as a whole; however, mid-range performance targets for highway and bridge conditions are expecting an overall decline during the plan period because expected revenues are not sufficient to meet the region's needs.

Figures IV-1 and IV-2 compare constrained revenues with the extensive overall asset management needs for preservation, rehabilitation and replacement or reconstruction of the region's highways and bridges. These charts do not include needs or revenues for

safety, system operations and modernization or any added capacity. The comparison signals a significant funding gap between needs and available future revenues. SPC needs estimates were developed with the help of PENNDOT using asset management system data, and processes consistent with PENNDOT's Transportation Asset Management Plan (TAMP).

The revenue shortfall demonstrated in the asset management numbers extends to other transportation investment categories – transit as well as highway. This funding gap is also chronic – national and state reports have highlighted a growing problem in transportation finance for more than 15 years. If federal and state transportation revenues are not increased during this LRP period the condition and performance of the overall transportation system would be expected to significantly worsen.

Strategies included in Section II: Vision to Action discuss matching revenues to needs, identifying new revenues sources, and promoting public/private partnerships are intended to initiate a regional dialogue as how to best bridge funding shortfalls.

Transportation Financial Planning

In accordance with federal and state financial planning guidance, the plan includes an estimate of the revenues reasonably expected to be available to support a long range, multimodal transportation program. For this plan (2025-2050), financial estimates are based on Pennsylvania's 2023 Transportation Program Financial Guidance, which was developed by a statewide work group and used to establish funding levels for the 2023-2026 Transportation Improvement Program (TIP). The guidance identifies federal and state funding formulas that are used to allocate revenues to planning regions across the state. The formulas are considered to be needs-based and are responsive to program-specific performance criteria. Representative examples of current statewide needs criteria include: population; population density; transit service area; highway lane miles; bridge deck area; crashes; air quality deficiencies; vehicle miles traveled; truck usage; and the physical condition of roads, bridges, and transit infrastructure.

Revenue estimates are provided for plan Stage 1, Stage 2, and Stage 3. Stage 1 includes the four-year TIP cycle (2023-2026). Stage 2 includes the remaining eight-year period of the state's Twelve-Year Program (TYP) (2027-2034). Stage 3 includes the remaining years in the planning period (2035-2050). Revenues are calculated using an assumed revenue growth rate of 1% per year.¹ A 3% annual inflation rate is also applied to estimated project costs. This is a change from the last LRP update, which assumed a 2% growth rate and 2% inflation rate.

Estimated revenue for the Highway Program is about \$1.9 billion for Stage 1 (the TIP period); \$3.8 billion for Stage 2, and; \$8.8 billion for Stage 3, with details shown in Table IV-1.²

¹ This rate is applied out until 2047, with no revenue growth thereafter through 2050. Revenue growth and inflation rate assumptions are based on "SPC Long Range Plan Inflation and Revenue Growth Outlook for the Highway Program (April 2023)".

² Despite a lower assumed revenue growth rate compared to the previous LRP update, available highway program revenues, particularly for Stage 2 and 3, are higher for several reasons. One is that revenues for the Carbon Reduction Program are now included. Another is that the Stage 3 period is now three years longer.

Table IV-1: Constrained Revenue Summary by Funding Source, Highway Program

LRP Transportation Investment Plan Constrained Revenue Summary, Highway Program³				
Fiscal Category	Short-term 2023-2026	Mid-term 2027-2034	Long-term 2035-2050	Total 2023-2050
Federal NHPP	344,642,000	536,077,000	1,189,040,000	2,069,759,000
Federal STP	161,739,000	352,507,000	791,922,000	1,306,168,000
Federal STP-Urban	148,365,000	319,477,000	717,718,000	1,185,560,000
Federal Bridge - BRIP	211,180,000	441,816,000	992,558,000	1,645,554,000
Federal Bridge Off-System	136,512,000	285,601,000	641,614,000	1,063,727,000
Federal HSIP	57,057,000	125,427,000	281,778,000	464,262,000
Federal CMAQ-CRP	129,557,000	270,961,000	608,725,000	1,009,243,000
Federal TAP	15,092,000	32,562,000	73,152,000	120,806,000
State Highway ⁴	203,206,000	470,327,000	1,155,164,000	1,828,697,000
State Bridge	193,074,000	399,910,000	996,979,000	1,589,963,000
A-409 - District Maintenance ⁵	264,771,000	547,789,000	1,230,137,000	2,042,697,000
Estimated Local Sponsor Matching Funds	78,211,000	64,000,000	128,000,000	270,211,000
Total – Highway Program	1,943,406,000	3,846,454,000	8,806,787,000	14,596,647,000

³ Funding for the Interstate Program is managed as a statewide program and is not included in the LRP revenue estimates. Other Statewide Discretionary Programs and toll-supported projects through the Pennsylvania Turnpike Commission are also managed and identified separately.

⁴ The statewide Rapid Bridge Replacement Program (RBR) requires a drawdown from the SWPA region's State Highway and State Bridge Funds to repay RBR bonding from 2015. After the bond repayments are completed in 2034 these revenues are included once again in the region's revenue totals, and are also adjusted for assumed revenue growth.

⁵ A-409 Maintenance spending is determined by the state for use at the PennDOT District-level. It is commonly used to support regular maintenance tasks, operations (including winter treatments for snow and ice), drainage and guiderail repairs, and various pavement or bridge repairs or preservation. This funding is not available for capital investment projects listed in the Long Range Transportation Plan.

The transit projects listed in this plan will be funded from state, federal and local sources, including:

- Federal Transit Urbanized Area Formula grants provided to the Pittsburgh urban area. These funds are shared by agreement by the transit agencies that operate service in the urban area.
- Federal Enhanced Mobility of Seniors & Individuals with Disabilities formula funding which is administered by the state for assisting Shared Ride/paratransit services throughout the region.
- Federal formula grants for rural areas, also administered by the state, for providing transit service in rural parts of Pennsylvania.
- State of Good Repair formula grants for capital assistance, maintenance and rehabilitation projects.
- Bus & Bus Facility Grants to rehabilitate and purchase buses and related equipment. This program includes both a formula component for the Pittsburgh Urbanized Area and the opportunity to compete for discretionary grants for specific projects.
- Transit Security Funding for PRT to fulfil its statutory requirement for transit security measures.
- Federal highway funds that are “flexed” annually to support transit projects.
- State sources, such as funding for community transportation, projects of statewide significance, mass transit operating, and asset improvement.
- Local sources, such as Allegheny County’s Regional Asset District and drink tax.

Estimated Transit Program revenue is \$3.3 billion for Stage 1; \$6.6 billion for Stage 2, and; \$15 billion for Stage 3, with details shown in Table IV-2.⁶

This plan assumes that federal formula and transit flex sources will continue through the three stages of the plan. The plan assumes the availability of formula and discretionary sources sufficient to meet the region’s transit needs through 2034 using the increased funding available through the 2022 Infrastructure Investment and Jobs Act, however funding for major discretionary projects in Stage 3, such as new Bus Rapid Transit or Light Rail lines, will access funding as the projects are approved.

This plan recognizes the discretionary nature of these long-range transit expansions by showing these projects in the “Projects Currently Beyond Fiscal Constraint” list. This is another instance that the strategies found in Section II: Vision to Action, which discusses sustainable public transit funding and regional collaboration can help bring these transformative capacity-adding transit projects to fruition.

⁶ Total transit revenues shown in the table are much larger than those shown in SPC’s previous LRP. While transit funding has increased since then, the main reason for the difference is that that Table IV-2 now includes revenue sources beyond federal formula and flex funding (ex: state capital and operating assistance).

Table IV-2: Constrained Revenue Summary by Funding Source, Transit Program

LRP Transportation Investment Plan Constrained Revenue Summary, Transit Program				
Fiscal Category	Short-term 2023-2026	Mid-term 2027-2034	Long-term 2035-2050	Total 2023-2050
Federal Urban Transit Formula Funds	1,193,176,000	2,084,449,000	4,580,522,000	7,858,145,000
Federal Rural Area Formula Funds	11,858,000	71,383,000	138,485,000	221,725,000
Federal Disc. – Capital Investment Grant (CIG)	225,365,000	587,200,000	166,400,000	978,965,000
Federal Enhanced Mobility for Seniors & Ind. with Disabilities	15,667,000	47,600,000	112,588,000	175,856,000
Federal Op. Assistance for Small Urban Areas	500,000			500,000
Federal Transit Flex	24,689,000	51,652,000	116,039,000	192,380,000
Est. Non-federal Match for Fed. Capital and Operating Funding ⁷	368,189,000	710,571,000	1,278,508,000	2,357,268,000
Federal Transit Security Formula Fund (No match required)	2,000,000	4,000,000	10,381,000	16,381,000
State Capital Funding ⁸	76,593,000	75,090,000	1,602,000	153,284,000
State Operating Assistance	1,341,521,000	3,008,069,000	8,626,632,000	12,976,222,000
Total - Transit Program	3,259,556,000	6,640,014,000	15,031,157,000	24,930,727,000

Overall, the regional grand total for constrained highway and transit program investments is \$39.5 billion for the 28-year period.

Table IV-3: Constrained Revenue Summary by Funding Source, Combined Programs

LRP Transportation Investment Plan Constrained Revenue Summary, Grand Total
--

⁷ Non-federal match includes required state and local funding equal to 20% of each federal transit revenue source in the rows above this line item, except for Federal Op. Assistance for Small Urban Areas, which requires a 50% match.

⁸ State law calls for a 15% local match for State Capital Funding and State Operating Assistance revenues. However, in practice the legislature often enacts project level exceptions or variations on this requirement, making it difficult to estimate for out periods.

	Short-term 2023-2026	Mid-term 2027-2034	Long-term 2035-2050	Total 2023-2050
Grand Total	5,202,962,000	10,486,468,000	23,837,944,000	39,527,374,000

Transit Program Project Selection

The Pennsylvania Department of Transportation (PennDOT) is responsible for managing all public transit programs for the Commonwealth. The public transit annual budget includes \$1.5 billion in state funds and more than \$30 million in direct federal funds. PennDOT plays a central role in transit project selection for transit investments in the TIP and plan due to their position as the dominant funding source for public transit programs.

Transit Capital Investments for nearly all of the region's public transportation agencies are managed utilizing consolidated planning activities and grant-making through the PennDOT Bureau of Public Transportation (BPT). For management purposes, transit agencies fall into two basic types based on size and mode. Port Authority of Allegheny County is a Tier I agency, operating bus and rail fixed guideway service as well as a fixed route bus system with more than 100 vehicles. There are 15 "small" Tier II agencies in the region operating fewer than 100 vehicles in either fixed route or non-fixed route modes.

All public transportation agencies are required to use reviewed and accepted Transit Asset Management (TAM) planning practices to reach and maintain assets in a state of good repair. TAM planning accounts for the full life-cycle of an asset used for public transportation service, from procurement through operations and maintenance to final disposition. Basic objectives for the TAM planning model are:

- Monitor and manage public transportation assets
- Improve safety
- Increase reliability and performance
- Establish asset performance measures

Tier I agencies such as the Port Authority manage their TAM planning functions internally. Planning systems and outputs, including performance measures and targets, are reviewed directly by the Federal Transit Administration (FTA). Federal grant-making is also direct with FTA. State funding and grant-making processes are managed through PennDOT. Small transit agencies as recipients of FTA Section 5310 and Section 5311 funding are required to participate in a state-managed TAM Group Plan. In addition, small transit agencies can also elect to participate in the PennDOT TAM Group Plan to fulfill planning responsibilities for other transit funding (Section 5307, etc.).

PennDOT has established a TAM Group Plan that provides consolidated transit asset management services for both required and elective program participants. The TAM Group Plan fulfills federal PBPP requirements (Performance Based Planning and Programming) and encourages communications between participating transit agencies and their respective MPOs. All of the small transit agencies in the SPC region have established formal cooperative agreements with PennDOT guiding their

participation in PennDOT's TAM Group Plan.

PennDOT annually updates performance targets for each agency based on two primary elements: prior year's performance, and anticipated/obligated funding levels.

In summary, transit agencies use the PennDOT TAM Plan tool – the CPT – to input information on asset inventories and detailed asset conditions into a statewide transit asset management computer system. The TAM tool uses the input data for each agency to generate four-year capital plans and performance targets based on asset-specific state of good repair performance criteria for various categories of vehicles, equipment, and facilities. These sources inform the development of annual capital programs, which are shared with the MPO for approval and inclusion in the region's TIP.⁹ The annual capital programs become an agency's funding application within PennDOT's electronic grants system. Proposed transit investments from the annual capital program have already been prioritized against competing statewide project needs and available statewide funding, so the agency applications are typically funded as submitted.

The TAM tool also provides an opportunity for users to input projects beyond the four-year capital plan period. These additional projects have been provided to SPC for inclusion in the Stage 2 and Stage 3 project lists, and fall within the funding limits of the Revenues and Projects Currently within Fiscal Capacity. In Stage 2 and Stage 3, total transit investment identified in the investment category project lists is less than the amount of available transit revenue in Table IV-2. The remaining funding that is not yet committed to projects will be held in reserve for the identification of future project needs.

Transit Capital Investments

Transit investments for Stage 1 (FY2023-2026) of the plan are taken directly from SPC's TIP. Stage 2 and Stage 3 projects are taken from these sources:

- Operating Assistance projects are assumed to remain stable over the life of the plan
- The PennDOT Bureau of Public Transportation's Capital Planning Tool estimates the state's capital investment priorities through the year 2030—for example, by projecting when an agency's buses will exceed their useful operating life—and these projects are listed
- Port Authority of Allegheny County's long range capital improvement plans

Transit new capacity projects are typically funded through a mix of federal and state formula funding as well as discretionary sources. These projects are shown separately because some projects or project elements are not yet developed to the extent that they can be accurately modeled for air quality conformity. They are also not currently within the fiscal capacity of the plan and additional discretionary funds

⁹ The region's transit agencies share with the SPC Transit Operators Committee and Transportation Technical Committee project information from the agencies' annual capital programs and four-year capital plans, providing SPC partners with the opportunity to review and comment on the project candidates. The projects are then programmed in SPC's Draft TIP, taken out for public comment, and adopted by the Commission in its approved TIP.

will be necessary in delivering these transformative regional projects. Descriptions of these projects can be found in Appendix IV-2.

Table IV-4: Transit Capital Investment Summary by Investment Category

	Stage I (2023-2026)	Stage II (2026 - 34)	Stage III (2035-50)	Total LRTP
Bus Facilities & Equipment	\$ 217,188,175	\$ 866,857,379	\$ 1,681,877,945	\$ 2,765,923,499

Constrained Investment Plan – Highway and Bridge Program

The Highway Program Investment Summary (Table IV-9) identifies about \$12.5 billion in anticipated revenues and their subsequent investments in plan Stage 2 (2027-2034) and Stage 3 (2035-2050). Investments include highways and bridges (preservation and rehabilitation/ replacement/reconstruction), safety, operational and reliability improvements, sustainability and livability enhancements, air quality enhancing projects, new capacity and regular maintenance and snow removal. Many projects are concentrated on the National Highway System (NHS); another large share is designated for asset management projects on other federal-aid network roadways. Bridge projects account for 58% of the future asset management budget, consistent with the average during the previous ten years.

Like the Public Transit Program, there are few new capacity projects within the Revenues and Projects Currently Within Fiscal Capacity list, but many additional needs are identified in Appendix IV-2 as part of a strategy to secure additional discretionary funds through state managed programs (Interstate Maintenance and the Spike), as well as federal discretionary programs under the Infrastructure Investment and Jobs Act (IIJA).

Investments are reasonably balanced across the eleven highway program investment categories. They work to support the region in achieving 17 near-term federal performance targets adopted by the Commission and described in Appendix II: Transportation Performance Management. Performance over the longer term, particularly in terms of asset condition, will depend on increasing revenues to match an expected increase in overall needs caused by necessary future preservation, rehabilitation, and reconstruction work.

Highway and Bridge Program Project Selection

SPC developed the Highway and Bridge Program and investment category-based project lists through a coordinated, cooperative and comprehensive transportation planning process similar to the TIP development process. Plan development was guided and supported by the SPC Transportation Technical Committee (TTC) and member agency planning and technical staff. LRTP Project List Development Work Groups were established for each of the three PennDOT Districts. Project list development was advanced through eight TTC meetings and nine program work group meetings held at the region's PennDOT District Offices.

The Work Groups reviewed an extensive number of prospective candidate projects and programs collected from multiple state, regional and local planning documents and other sources:

- Ongoing TIP projects
- Still-current projects carrying over from the previous LRTP
- The Regional Operations Plan and Safety Action Plans
- The region's Congestion Management Process
- Public and stakeholder comments received through the 2023 TIP and SPC Plan-development processes and public meetings
- Candidate projects identified by PennDOT, counties, the City of Pittsburgh, transit providers and the three TMAs

Stakeholders submitted additional candidate projects via the SPC LRTP candidate submittal project template. Required information included a project need description, project purpose, project cost estimate, LRTP stage, investment category, and performance measure and LRP strategy consistency check.

Members identified candidate projects based on their system management methodologies, plans, and priorities in areas of asset management, safety, congestion management and air quality, livability and mobility, as well as economic development. Pavement and bridge condition forecasts are generated by PennDOT's Asset Management Division using its Pavement Asset

Management System (PAMS) and Bridge Asset Management System (BAMS). The projections are based on current condition data housed in PennDOT databases and the improved conditions expected as a result of future projects. These systems utilize a lowest life-cycle cost (LLCC) asset management framework for prioritization of projects balancing both preservation and rehab/replacement requirements. Recommended transportation system investments are produced by the PAMS/BAMS derived from financial information provided in PennDOT's lists of programmed projects from the PennDOT Multi-modal Project Management System (MPMS). Each of the PennDOT Districts consult these systems in the identification and prioritization of candidate asset management projects within the district for the LRTP period.

The Work Group updated project costs and scheduling information for carryover projects. Public comments and new candidates were compared with existing projects and candidates to eliminate duplication.

Work Group participants discussed and reviewed overall transportation needs, revenue projection assumptions, available revenues, specific corridor needs, transportation system performance measures, and expected spending based on current conditions. Due to overall needs far outweighing the available revenue estimates, some candidate projects requested for delivery in Stage 2 were delayed to the Stage 3 period because of funding limitations.

The project lists were designed to identify large projects that require a significant up-front planning and financial commitment. For most of the investment categories, the project lists identify a numerous set of these financially-significant projects, while purposefully retaining a series of reserve line items of uncommitted funding that, during future TIP update processes, can be matched to many smaller candidate projects that emerge through the ongoing planning process.

Candidate projects were screened and evaluated based on consistency with SPC LRP strategies, federal and state transportation planning factors, and federal transportation performance measures. The candidate projects were grouped into major investment categories. Criteria were developed to evaluate candidate projects on these strategies, factors, and measures. Evaluation results were a significant input into the overall project selection process conducted by the LRTP Work Groups. In addition to the candidate evaluation, expert input from safety, bridge, and highway engineers involved in the LRTP work group was instrumental to the consensus driven approach used by the work group in finalizing the fiscally constrained project list.

Highway and Bridge Program Project Lists

The summary of Highway and Bridge Program planned investments (Table IV-9) demonstrates significant commitment across all categories of needs, with special attention to the National Highway System (NHS) and asset management needs in particular. Important investment categories such as Safety, Bridge Preservation, Bridge Rehabilitation/Reconstruction, Roadway Preservation, Roadway Reconstruction, Efficiency and Operations, Sustainability, Livability and Air Quality each receive sufficient funding attention to advance the region in achieving identified near-term performance targets.

The comprehensive investment summary presents anticipated project-based spending levels for each investment category for the region and each PennDOT District in Table IV-9. The relative importance of various investment categories might change across the region depending on the specific characteristics of the highway network within each PennDOT District. There are noticeable differences across districts in the number of bridges and roadway mileage as well as varying ages and physical condition of specific pavements and bridges. Highway mileage designated as National Highway System is also a contributing factor.

4/5/2023

Table IV-9: Highway Program Investment Summary (\$)

Investment Category	Region		District Ten		District Eleven		District Twelve	
	Stage 2	Stage 3	Stage 2	Stage 3	Stage 2	Stage 3	Stage 2	Stage 3

LRP Stage 2 includes the period 2027-2034. LRP Stage 3 includes the period 2035-2050.

SmartMoves IP - 2023FC Worksheets 4/5/23 (PA23TPFG)

All Bridges = NHS and STP networks only (not OSB)

Estimated Revenue for the Highway and Bridge Program is nearly \$14.5 billion: about \$1.9 billion for the TIP period (LRTP Stage 1); \$3.8 billion for LRTP Stage 2; and \$8.7 billion for Stage 3. Available funding includes nearly \$5 billion preservation and reconstruction on NHS highways and bridges in Stages 2 and 3. Approximately \$740 million of the operations and safety funds are on projects on the NHS network.

The CMAQ/CRP/TA/Smart Regional Line Item represents a reserve funding source for livability, sustainability and air quality improvement projects. The investment plan forecasts the revenue sources that typically fund projects such as bicycle and pedestrian infrastructure and programs; projects that link land use and transportation planning; community enhancements; first and last mile transit connections; and other types of projects that enhance air quality and reduce congestion. These include the SPC CMAQ Program, the SPC Carbon Reduction Program, the SPC Transportation

Alternatives Set-Aside Program, and the SPC Livability through Smart Transportation (Smart) Program. Each of these competitive programs maintains programmatic requirements and detailed, competitive selection processes associated with the TIP update, therefore no projects are shown on the Projects Currently within Fiscal Capacity list.

The list in Appendix IV-2 Projects Currently Beyond Fiscal Capacity, shows projects submitted through the Work Groups, engagement with county/city stakeholders, and public engagement that are anticipated to be advanced by sponsors through these and other programs. In fact, many segments of the trail networks outlined in Appendix IV-2 have been successful in securing federal funds through SPC's competitive programs.

Specified Reserve Funds were also established for identified special needs:

- **Local Bridges/Off System Bridges** – within the program development Work Groups, concern was voiced that in the era of federal performance measures and focus on the NHS that lower level network bridges may suffer. In response, SPC in collaboration with Work Group members established a specified reserve amount for off system/local bridges within the Revenues and Projects Currently within Fiscal Capacity list.

Landslide Remediation - based on current experience, several high-profile incidents, and future projections, landslides are anticipated to become an increasingly expensive impact on the region's transportation program. The counties with the highest incidence of and susceptibility for landslides are Allegheny, Beaver, Fayette, Greene, Washington and Westmoreland. Reserve funding amounts have been

identified as a portion of the roadway investment categories for use in addressing roadways impacted by landslides in these areas. The new Federal Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Program may also contribute needed funds to landslide remediation and adaptation projects. Current 2023 PA Financial Guidance has not yet provided guidance on the details of the PROTECT funding available to regions. Therefore, figures for PROTECT are not included in the LRTP investment plan (Table IV-9) at this time.

Expectations for Transportation Systems Performance and Future Funding Needs

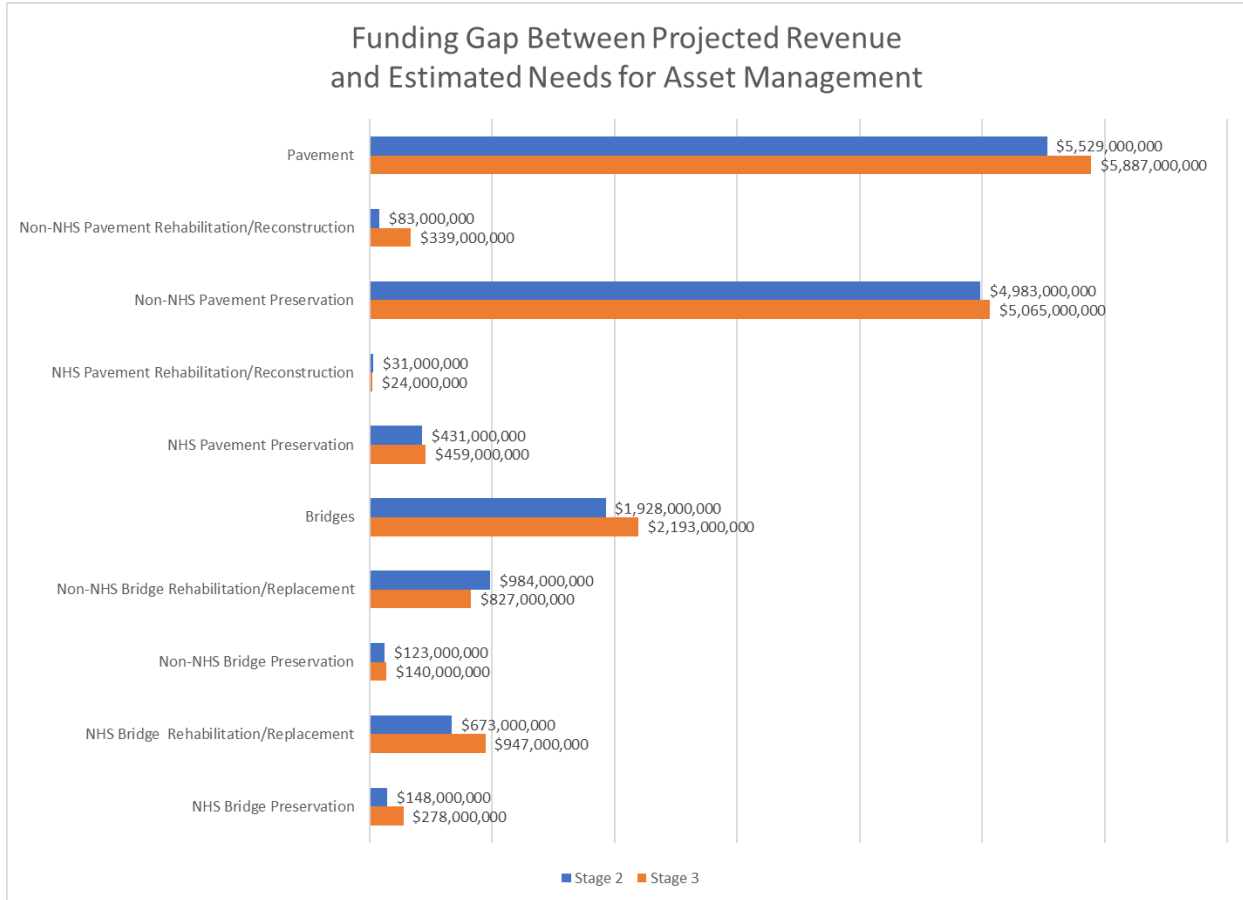

PennDOT has developed statewide asset management systems to analyze needs and evaluate asset management treatments. PennDOT's Bridge Asset Management System (BAMS or BridgeCare) and Pavement Asset Management System (PAMS) programs project asset deterioration, evaluate potential treatments, and recommend improvement projects in order to achieve Least Life Cycle Costs (LLCC). The BAMS and PAMS are used by PennDOT to produce analytics that inform the statewide Transportation Asset Management Plan. PennDOT provided expertise and a series of scenario data runs from these systems to SPC for analysis and use in estimating asset management needs and costs through the life of the LRTP planning period. The PennDOT asset management systems estimated that a total of \$22.49B in bridge and roadway work on Federal Aid and PennDOT networks within the SPC region in LRTP stage 2 and 3. Figure IV-1 charts the difference between the projected needs and the revenues that are expected to be available from the LRTP investment plan.¹⁰

While it is important to understand that the expected highway and bridge spending supported by the region's Revenues and Projects Currently within Fiscal Capacity list will have a significant positive impact on future transportation system performance, overall transportation needs are much greater than available AM funding – more than triple the funding that is currently being collected through current revenue sources.¹¹ Even if the entirety of the revenues currently planned for new capacity and efficiency, operations, and safety were allocated to AM needs, needs would still outweigh revenues by a margin of 2.6 to 1.

¹⁰ Chart figures exclude estimated need costs and revenues for assets on local networks, with the exception of local bridges on the NHS. Interstate needs and revenues from the interstate program are also excluded.

¹¹ After accounting for needs that could be addressed by the current (2023-2026) TIP budget, the remaining treatment cost estimates were used to estimate funding gaps for Stage 2 and 3. The revenue figures used to compute the gaps were based anticipated AM investments from SPC's current investment plan (Table IV-9) with funds for each category rebalanced between preservation and rehabilitation/replacement/construction treatments according to the proportion needed according to BAMS/PAMS. While LRTP projects are not currently fully aligned with LLCC goals, the expectation is that moving forward, projects selected for the TIP and LRTP will increasingly hew toward what BAMS and PAMS are recommending in pursuit of LLCC, and the gap charts are intended to reflect that. While at the end of the day, the total need for the planning period was not that different from what SPC projected in the last LRP update, due to the goal of LLCC the mix of recommended treatments was different, for example, calling for much more pavement preservation. Importantly, the models assume that timely preservation will lead to reduced reconstruction costs over the long run. If preservation treatments are not provided in a timely fashion, actual reconstruction needs would be higher than the chart indicates. As noted in the TAMP, SPC expects there will be an ongoing learning curve for all parties as the data and models of the BAMS and PAMS systems are continuously improved and refined. See: <https://www.penndot.pa.gov/ProjectAndPrograms/Asset-Management/Documents/PennDOT-TAMP.pdf>, p18.

Figure IV-1: Estimated Asset Management Funding Gap

While IIJA increased funding available for asset management, projected revenues for Stage 2 and Stage 3 still only comprise about a third of the funding needed for the preservation, rehabilitation, and replacement/reconstruction of bridge and highway assets on the NHS and non-NHS networks. The largest gaps are for pavement preservation needs on the non-NHS network, and bridge rehabilitation and replacement needs on both the NHS and non-NHS networks. Projections indicate that revenues will cover only 22% of needs for Stage 2, and 40% of Stage 3 need, and that while 49% of estimate bridge needs will be covered during the planning period, only 23% of pavement needs will be funded. By treatment, 47% of rehabilitation/reconstruction/replacement needs are covered, vs. 26% of preservation needs. By network, about 62% of NHS asset AM costs are covered, vs. only 17% of non-NHS costs. Overall, about \$15.5B in additional revenues are needed to close the gaps.

The overall conclusion is that investment decisions for the highway and bridge asset management categories are diversified and reflect an appropriate overall commitment to Asset Management spending. But the overall shortfall in available funding is serious and means that without an overall increase in funding, transportation system performance will deteriorate during the period of this plan.

Highway Bridge Projects within Fiscal Capacity List

The Projects in the Revenues and Projects Currently within Fiscal Capacity list are then

listed in the following table, identifying estimated project costs, timeframe, investment category and a description of the project need. It is also noted if a project could contain multimodal connections. Potential multimodal connections are noted in the project tables so that infrastructure owners can plan accordingly, before Stage 2 and 3 projects begin the project development process. This reinforces the Strategy of Prioritizing and Streamlining Project Development by considering all modes of transportation early in the planning process.

The following table shows the projects in *SmartMoves for a Changing Region* that are within current fiscal capacity of this plan. Stage 1 of the LRTP is the current 2023 TIP, for a complete list of projects on the current SPC TIP visit the 2023-2026 TIP information on the SPC website: <https://www.spcregion.org/programs-services/transportation/smartmoves-long-range-plan-transportation-improvement-program/>. The current 2023 Highway/Bridge TIP (June 2023) and Transit TIP is also listed at the end of this Appendix (IV-1).

12	Westmoreland	Salina Bridge*	\$13,390,000	1060	Mid-Term (2027-2034)	The State Route 1060 (Bridge Street)/Salina Bridge over the Kiskiminetas River and Norfolk Southern Railroad connects Bell Township, Westmoreland County with Kiskiminetas Township, Armstrong County. The project proposes to replace the Salina Bridge on a new alignment located immediately downstream from the existing bridge. The proposed bridge is anticipated to be a 3-span continuous composite steel plate girder bridge. The project will also address the existing deteriorated retaining wall parallel with SR 1060 approaching the bridge from the south. The approach roadway will be widened to provide 11' travel lanes and 5' shoulders. The intersections at each end of the bridge will be modified to improve maneuverability. Drainage will be upgraded as well as the guiderail, signs, and pavement markings. *No new capacity will be added*	Bridge Rehab/ Reconstruction	81747
12	Westmoreland	North Greengate Road SR 4002 RR Tunnel	\$15,500,000	4002	Mid-Term (2027-2034)	This project is for the reconfiguration of SR 4002 (North Greengate Road) in the vicinity of a railroad overpass in Hempfield Township, Westmoreland County.	Bridge Rehab/ Reconstruction	119609

District	County	Title	Estimated Cost	Route	Stage	Narrative	Investment Category	MPMS/GIS ID
12	Westmoreland	LVTIP: Norvelt to Pleasant Unity*	\$36,565,000	981	Mid-Term (2027-2034)	This project is for corridor improvements to PA 981 from the village of Norvelt to the village of Pleasant Unity in Mt Pleasant Township, Westmoreland County. SR 981, Section V20 is approximately 3.5 miles and begins north of the SR 981 and SR 2021 (Kecksburg Road)/Mt. Pleasant Road intersection (Norvelt intersection) in Mount Pleasant Township. From just north of the Norvelt intersection, the project area extends generally along SR 2023 to the intersection with SR 130 in Unity Township. Section V20 primarily follows existing SR 2023 with some offline shifts to improve the roadway.	Efficiency & Operations	108010
12	Westmoreland	LVTIP: Pleasant Unity to Airport	\$30,000,000	981	Mid-Term (2027-2034)	The LVTIP (Laurel Valley Transportation Improvement Project) project will upgrade 12 miles of the PA 981 corridor from the intersection with PA 819 in Mount Pleasant Township to the Westmoreland County Airport in Unity Township. The LVTIP will be constructed in three separate sections. Section Y10 is the northern most and will tie into the recently completed 981-V10 project near the airport. SR 981-Y10 is approximately 2.5 miles in length and begins just south of the intersection of Bingham Road and the SR 2023 (Hill Churches Road) intersection in Mt. Pleasant Township. SR 981- Y10 then primarily follows existing SR 2023 northward to near the intersection with Green Street. At this point, the alignment proceeds in a northwestward direction to the Westmoreland Airpark. It then extends through the Airpark along the southern portion of Bay Hill Drive then intersects with existing SR 981 just south of the Arnold Palmer Airport. Corridor improvements would include on-line upgrades as well as segments of new alignment where upgrades are not feasible due to physical/environmental constraints	Efficiency & Operations	108140
12	Westmoreland	US 119 West Tec Drive*	\$4,500,000	119	Mid-Term (2027-2034)	This project is for the highway restoration of US 119 in the West Tec Drive exit area in East Huntingdon and Hempfield Townships, Westmoreland County.	Roadway Preservation	119625

Title: SPC - Traffic Signal 4

Improvement Type: Existing Signal Improvement

State Route: 50

Municipality: Collier (TWP)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date: 1/12/2023

Estimated Construction Bid Date: 1/12/2023

Location: Located on State Route 50 in Scott/Collier/Heidelberg, SR 286 in Plum; Lincoln Avenue n Bellevue in Allegheny County, State Route 2001 in Baden, Beaver County; State Route in New Castle/Shenango, Lawrence County.

Project Description: (Sponsor = SPC) SPC's Regional Traffic Signal Program proposes to continue its mission of improving the operation and safety of the region's key arterial corridors by funding and implementing signal improvement projects that result in optimized and coordinated signal operations. Working with municipalities and PennDOT, this has been achieved with two types of projects:

-SINC-UP projects: These projects include minor equipment upgrades in addition to signal retiming. The equipment upgrades are focused on areas required for signal coordination energy savings, and safety (communications, controllers, and indications). These projects may also include removal of traffic signals that are no longer warranted.

-SINC projects: These projects include signal retiming only for corridors and intersections that are already adequately equipped for coordination purposes.

Title: Freedom Rd Upgrade - Ph A

Improvement Type: Relocation/Realignment

State Route: 2004

Municipality: Freedom (BORO)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date: 9/15/2016

Estimated Construction Bid Date: 9/15/2016

Location: Located on SR 2004 (Freedom Road) from SR 65 to Park Quarry Road in New Sewickley Township, Beaver County.

Project Description: Reconstruction and realignment of portions of S.R. 2004 (Freedom-Crider Road) and Crows Run Road in the Borough of Conway and New Sewickley Township, Beaver County. The project starts near the existing intersection of T-575 (Crows Run Road) and S.R. 0065 (Ohio River Boulevard) in the Borough of Conway and proceeds to approximately 1000 feet east of the existing S.R. 2004 intersection with T-606 (Park Quarry Road) in New Sewickley Township. The project will consist of reconstructing T-575 (Crows Run Road) and relocating S.R. 2004 to follow the T-575 corridor. The new roadway will be widened to include two-11' lanes with 6' shoulders. Turn lanes will be added on S.R. 0065 at the new signalized intersection with reconstructed Crows Run Road (to be changed to S.R. 2004). A left turn lane will be added to reconstructed Crows Run Road onto S.R. 0065. A center turn lane will be added on S.R. 2004 near the intersection of Park Quarry Road and the newly named S.R. 2018. The total project is 8,910 feet in length (1.69 miles) and includes:

- 1.) Construction of new and replacement structures over Crows Run and its tributaries.
- 2.) Realignment of approximately 400 feet of Romigh Road and reconstruction of the intersection of Romigh Road and the proposed S.R. 2004.
- 3.) Realignment of approximately 800 feet of Park Quarry Road (T-606) and its intersection with S.R. 2004.
- 4.) Reconstruction of S.R. 0065 in the vicinity of the new S.R. 2004 signalized intersection.
- 5.) Relocation of four portions of existing Crows Run stream.
- 6.) Replacement of guide rail, drainage, signing, pavement marking, etc., related to the above items.

Title: US 119 Connellsville CMAQ

Improvement Type: New Traffic Signal

State Route: 119

Municipality: Connellsville (CITY)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 8/10/2023

Location: US 119 Corridor
City of Connellsville, Fayette County

Project Description: The SR 0119, Section SE4 (US 119 Connellsville CMAQ) project is located in the City of Connellsville, Fayette County. The project consists of traffic signal upgrades at six intersections that include US 119's intersections with: SR 1037 (Pittsburgh Street); McDonald's Driveway; York Avenue; Shopping Plaza Driveway; US 119 Southbound & SR 0711/SR 1051 (Crawford Avenue)/SR 0201 (Vanderbilt Road); and US 119 Northbound & SR 0711 (Crawford Avenue). The project will upgrade traffic signal controllers and other equipment as well as include hardware to support coordination of the intersections to improve traffic flow and reduce congestion and queuing. The project also includes upgrading existing ADA and pedestrian facilities at the signalized intersections, and replacement of signing & pavement markings.

Title: US 40/PA 281 Turn Lane Upgrades

Improvement Type: Safety Improvement

State Route: 40

Municipality: Henry Clay (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 7/13/2023

Location: Fayette County - Intersection of US 40 and PA 281
Westmoreland County - PA 380 at Auction Barn Road

Project Description: This project will address safety issues at two locations in the District by installing a left turn lane at the intersection of US 40 and PA 281 in Fayette County, and by converting a 4-lane divided highway to a 3-lane with a defined left turn lane on the major roadway (Westmoreland - SR 400 (PA 380) / Auction Barn Road).

Improvement Type: Safety Improvement

State Route: 2003

Municipality: Franklin (TWP)

Air Quality Status: Non-Significant: Not included in regional conformity analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 1/11/2024

Location: SR 2003/ SR 2028
Franklin Township
Greene County

Project Description: This project involves the reconstruction of the SR 2003 (Sugar Run Road)/ SR 2028 (South Porter Street) intersection located in Franklin Township, Greene County. The project is currently in the very early stages of Preliminary Engineering. The design consultant is gathering survey, right of way, and utility data. Once all of this information is obtained, the design consultant will develop a Preliminary Alternative Analysis Report investigating three (3) alternatives for review. The alternates under consideration at this time are a roundabout, relocation of the intersection(s), and improvements to the existing intersections.

Title: PA 18 Signal Upgrades

Improvement Type: Existing Signal Improvement

State Route: 18

Municipality: Washington (CITY)

Air Quality Status: Significant: Included in regional conformity analysis

Actual Construction Bid Date: 2/27/2020

Estimated Construction Bid Date: 2/27/2020

Location: PA 18- City of Washington

Project Description: This project includes the replacement of the following three existing traffic signals located in the City of Washington: PA 18 (Jefferson Avenue) at SR 4022 (Wylie Avenue), PA 18 (Jefferson Avenue) at PA 844, and SR 4022 (Wylie Avenue) at Allison Road. The project also includes two signals located at PA 18 (Jefferson Avenue) at SR 8014 (I-70 Ramps) and SR 4022 (Wylie Avenue) at SR 8014 (I-70 Ramps).

The installation of the new signals will include physical improvements such as: queue preemption for I-70 ramp approaches, detection on all approaches, LED signal heads, pedestrian accommodations, and spread spectrum radio system.

The project also includes various roadway improvements (such as ADA ramps and additional lanes as necessary).

Title: Salina Bridge

Improvement Type: Bridge Replacement

State Route: 1060

Municipality: Bell (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 12/7/2023

Location: BMS# 64 1060 0010 0000

Project Description: The State Route 1060 (Bridge Street)/Salina Bridge over the Kiskiminetas River and Norfolk Southern Railroad connects Bell Township, Westmoreland County with Kiskiminetas Township, Armstrong County. The project proposes to replace the Salina Bridge on a new alignment located immediately downstream from the existing bridge. The proposed bridge is anticipated to be a 3-span continuous composite steel plate girder bridge. The project will also address the existing deteriorated retaining wall parallel with SR 1060 approaching the bridge from the south. The approach roadway will be widened to provide 11' travel lanes and 5' shoulders. The intersections at each end of the bridge will be modified to improve maneuverability. Drainage will be upgraded as well as the guiderail, signs, and pavement markings.

No new capacity will be added

Title: LVTIP: Norvelt to Pleasant Unity

Improvement Type: Relocation/Realignment

State Route: 981

Municipality: Mount Pleasant (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 10/30/2025

Location: PA 981 from Norvelt to Pleasant Unity
Mount Pleasant Township, Westmoreland County

Project Description: This project is for corridor improvements to PA 981 from the village of Norvelt to the village of Pleasant Unity in Mt Pleasant Township, Westmoreland County.

SR 981, Section V20 is approximately 3.5 miles and begins north of the SR 981 and SR 2021 (Kecksburg Road)/Mt. Pleasant Road intersection (Norvelt intersection) in Mount Pleasant Township. From just north of the Norvelt intersection, the project area extends generally along SR 2023 to the intersection with SR 130 in Unity Township. Section V20 primarily follows existing SR 2023 with some offline shifts to improve the roadway. No new capacity is planned.

Title: LVTIP: Pleasant Unity to Airport

Improvement Type: Relocation/Realignment

State Route: 981

Municipality: Unity (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Actual Construction Bid Date:

Estimated Construction Bid Date: 10/31/2024

Location: PA 981 from Pleasant Unity to Airport
Mt Pleasant and Unity Townships, Westmoreland County.

Project Description: The LVTIP (Laurel Valley Transportation Improvement Project) project will upgrade 12 miles of the PA 981 corridor from the intersection with PA 819 in Mount Pleasant Township to the Westmoreland County Airport in Unity Township.

The LVTIP will be constructed in three separate sections. Section Y10 is the northern most and will tie into the recently completed 981-V10 project near the airport. SR 981-Y10 is approximately 2.5 miles in length and begins just south of the intersection of Bingham Road and the SR 2023 (Hill Churches Road) intersection in Mt. Pleasant Township. SR 981-Y10 then primarily follows existing SR 2023 northward to near the intersection with Green Street. At this point, the alignment proceeds in a northwestward direction to the Westmoreland Airport. It then extends through the Airport along the southern portion of Bay Hill Drive then intersects with existing SR 981 just south of the Arnold Palmer Airport. No new capacity is planned.

Corridor improvements would include on-line upgrades as well as segments of new alignment where upgrades are not feasible due to physical/environmental constraints.
